- Emerging Issues and Requested Advice
- B1.1 Invasive Species – The Emerald Ash Borer

Objective: Assist in the City's Forestry Services efforts in mitigating the potential destruction of 25% of the City's urban and rural forests against the Emerald Ash Borer (EAB) invasive forest insect.

EMERALD ASH BORER WORKING GROUP

July 2010 - We have now installed ten of the extra traps provided by the City's Forestry Services (see below for a map of locations and pictures of the traps).

The purpose of this work is to complement the City's program in tracking the progress and movement of the borer throughout the area, and also to help spread the word about the extent of the problem and to get more community support for tree

planting and other forestry programs to replace the ash trees (remember: Ash are 1/4 of Ottawa's trees!).

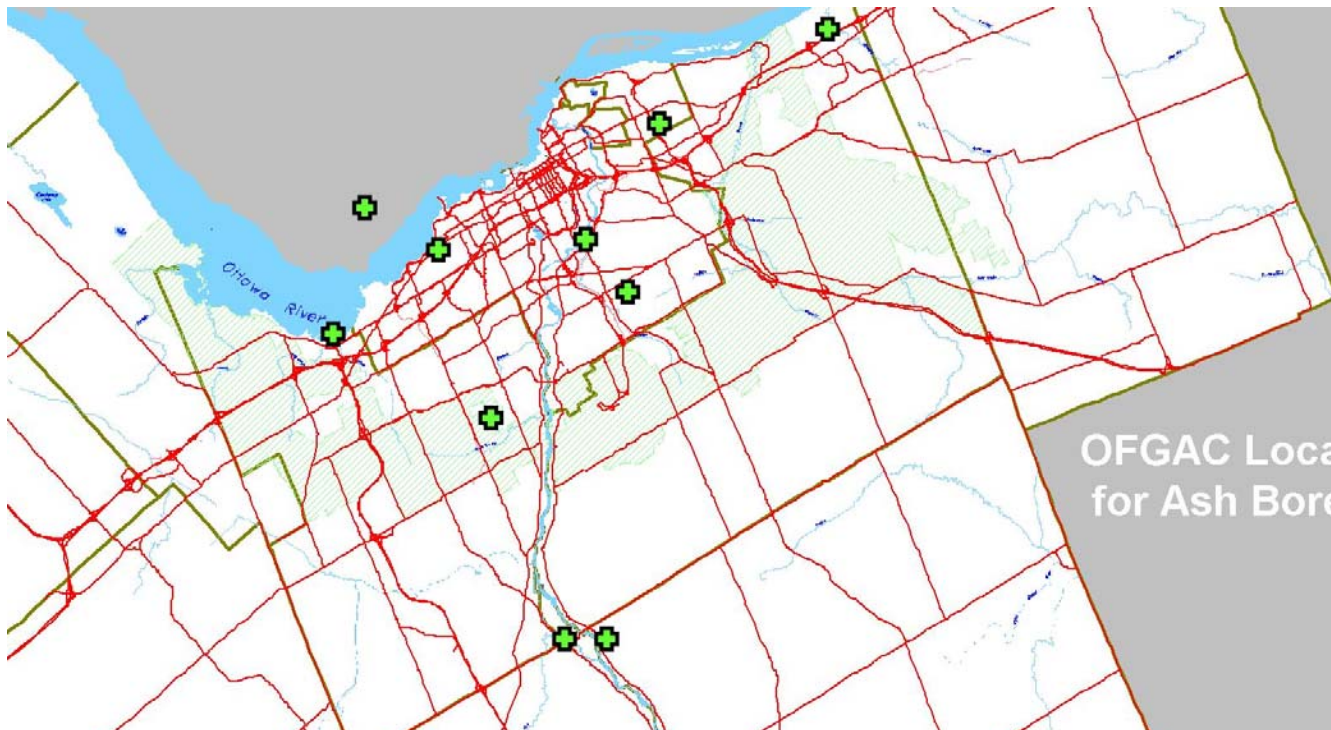

Many thanks to Eric, Klaus and Regie for their help installing and monitoring some of the traps. Thanks also to members of the Ottawa Horticultural Society who helped us find homes for the traps. We will provide more updates as we go.

for Ash Borer Traps

Emerald Ash Borer Trap
Piège à Agrile du Frêne

**Please do not disturb
this insect trap**

This trap has been placed on this ash tree to detect populations of the introduced emerald ash borer, a serious threat to ash trees.

For more information about emerald ash borer or this trap, contact the City of Ottawa, Forestry Services at 311 or visit ottawa.ca/eab

**Prière de ne pas
toucher à ce piège à
insectes**

Il a été installé sur ce frêne afin de dépister les populations d'agrile du frêne, un insecte introduit très dangereux pour cet arbre.

Pour plus de renseignements sur l'agrile du frêne, veuillez vous adresser à la Ville d'Ottawa au 311 ou consultez ottawa.ca/agnie
